

APEX DYNAMICS, INC.

**HIGH PRECISION
HIGH SPEED
PLANETARY GEARBOX**

AD / ADR / ADS Series

Stainless

Apex Dynamics, Inc. is the world's most productive manufacturer of servomotor drive planetary gearboxes for precision automation machinery. From our 800,000+ square foot ISO 9001:2008 manufacturing facility, based in Taichung, Taiwan, we manufacture to stock using the newest precision machine tools and quality test and inspection equipment. Complete focus on quality and precision allows us to produce our high quality gearheads at precision levels down to less than 1 arc minute (1/60 th of a degree), with consistency and high reliability.

Based on more than twenty years of accumulated manufacturing and marketing experience, plus the highest level of technical production capabilities, Apex Dynamics, Inc. designs and builds technically advanced, high speed, low backlash servo application planetary gearboxes. Our Break through patented technology (over 6 patents), provides the customer with the optimum high precision helical reducer at a reasonable price. We are continuously improving processes, finding proper and effective methods to provide customers new solutions for difficult applications, and developing new products.

The primary focus in daily operation is quality. We pride ourselves on our dedication to quality; our duty - is customer satisfaction.

AD Series Ordering Code

Ordering Example: AD047-010-P1 / SIEMENS 1FT6 041-4AF71

ADR Series Ordering Code

Ordering Example: ADR047-010-P1 / SIEMENS 1FT5 034-OAK71

ADS Series Ordering Code

Ordering Example: ADS047-010-S1-P1 / SIEMENS 1FT5 034-OAK71

A. Ratio ($i=N_{in}/N_{out}$)B. Max. acceleration torque T_{2B} = 60% of T_{2NOT}

C. Applied to the output shaft center at 100 rpm

D. For continuous operation, the service life time is less than 15,000hrs

E. These values are measured by gearbox with ratio = 10 (1-stage) or ratio = 100 (2-stage) at 3,000 rpm without load.

By smaller ratio and/or higher speed(RPM), the noise level would be higher

Permitted Radial and Axial Loads

The permitted radial and axial loads on input shaft of the gearbox depend on the design of the gearbox supporting bearings. APEX use the extension straddle oversized ball bearing design. It can take heavy load from both axes.

If radial force F_{2r} is exert on the center of the output shaft $X=1/2 \times L$.
 Under various operating condition the lifetime is over 20,000 hours.
 The permitted radial load is given on left diagram.

The result from assumption of load location as below.

If radial force F_{2r} is not exert on the center of the output shaft $X < 1/2 \times L$ or $X > 1/2 \times L$
 The permitted radial and axial loads can be calculated by the position load factor K_0 on the left diagram.
